

MINERAL SYSTEM FOR POOLS

Upgrade your pool to a mineral pool

First, there was chlorine. Then came salt. And now, there is minerals.

Less chlorine than traditional or saltwater pools

All swimming pools are sanitized with chlorine – even saltwater pools. With a mineral system, you can reduce the chlorine level by up to 80%.

It's never been easier to maintain a pool

Water stays **crystal clear** because algae can't grow and water parameters stay in balance longer.

Mineral pools cost less

Mineral systems cost less than salt chlorinators. If you use both minerals and salt, you will get more life from your salt chlorinator. Chemical costs are lower. Pool walls and equipment stay newer longer because of the lower chlorine concentration.

THINK **MINERALS**™

- Waterproof IP67 enclosure, suitable for outdoor use
Mounts with two screws or velcro (included)
- "Maintain" mode set according to pool volume
- Indicates when cell is active or needs to be changed
- Digital readout for indicating setting
- "Increase" mode for ramping up minerals after fill or refill
- Hold  and  to lock settings to avoid tampering
- Waterproof socket for mineral cell plug
- Works with 120V or 240V power

Installs in **30 minutes**

Minerals are released by the cell which is changed every 6-12 months

Model Number	Power	Hookup Kit	Maximum Volume
CBI-350P-25-MBG-KIT	120V or 240V Standard NEMA Wall Plug	Hard plumb PVC glue required	25,000 Gal. / 95,000 L
CBI-350P-25-MBG-AGKIT	120V or 240V Standard NEMA Wall Plug	Threaded parts, no glue required	25,000 Gal. / 95,000 L
CBI-350P-40-MBG-KIT	120V or 240V Standard NEMA Wall Plug	Hard plumb PVC glue required	40,000 Gal. / 150,000 L
